1. Catch the Big thief before the Small One

This is a fine theory God mentioned in a dream.

If you catch the guy who stole a few phones and punish him. You might think you are indeed successful. But I tell you, you have missed it.

Because the guy who stole a few phones did that because someone did not pay his parents the right wages and thus his parents are now said to be broke.

And thus if the guy who pays low wages wasn't caught, there would be another guy going out to steal phones.

Learn that you must solve the root of the problem.

2. How to inspect a Facility

Inspection of a facility seems quite simple: you employ somebody and he always inspects the facility.

If he gets bribed by the Bosses of the Facility then the country's project becomes stupid.

The solution is to pick someone at random with knowledge of the facility to go and inspect the facility. He would keep a record of the inspection and he is then dismissed.

Repeat this for every inspection.

It is a little job for each inspector but remember to pay him well.

3. Create Peace by Pleasing All

When selecting a project to execute, use this method to create peace.

Execute your projects in groups one for each faction. Examples of factions are the factory people, the builders, teachers etc.

If you can't execute projects for all the factions make sure you execute for about three factions minimum.

And thus there would be peace and harmony.

Not everything is simple, some things are difficult.

4. How to Locate your Next Meeting with the Other Governor

You must put this in mind that you should discomfort the least number of persons.

And thus make your meeting to be at half the distance between you and the other Governor.

Pick one of the possible locations at random and keep the location quite till after the meeting. This is for your own security.

5. Goodness is Immortality not abundance of Soldiers

You might believe that the abundance of Soldiers would get you immortality.

If you don't treat the soldiers well (goodness) there would be quarrels between you and the soldiers and thus reduce the wall governors place around themselves.

Also if you don't treat the people well (goodness) the soldiers would have some difficulty keeping the peace. And it gets worse with the increasing number of people you offend.

And thus I say Goodness is indeed immortality.
